European Policy Context 1/2

- COM (2016) 766 - A European strategy on Cooperative Intelligent Transport Systems, a milestone towards cooperative, connected and automated mobility.

Webs site:

- C-Roads. In 2016, Member States and the Commission launched the C-Roads Platform to link C-ITS deployment activities, jointly develop and share technical specifications and to verify interoperability through cross-site testing. Initially created for C-ITS deployment initiatives co-funded by the EU, C-Roads is open to all deployment activities for interoperability testing.

Web site: <https://www.c-roads.eu/platform.html>

- C-ITS Platform. The European Commission decided early 2014 to take a more prominent role in the deployment of connected driving, by setting up a C-ITS Deployment Platform. The Platform is conceived as a cooperative framework including national authorities, C-ITS stakeholders and the Commission, in view to develop a shared vision on the interoperable deployment of C-ITS in the EU. By endorsing the Final Report of the first phase of the C-ITS Platform on 21 January 2016, the C-ITS Platform has achieved its first milestone towards connected and automated vehicles in the EU.

- Revision of European ITS directive.

The ITS directive is being revised. The ITS directive is the main legislative framework for ITS applications in Europe.
